

# BONE *dry*

## ETCH-A-CRETE

ETCH-A-CRETE

### *For etching and cleaning concrete, masonry & stone*

Removes efflorescence, rust, mildew and airborne pollutants and is available worldwide

**Bone Dry Etch-A-Crete** is a user-friendly water soluble blend of mild inorganic acids, enzymes & wetting agents that causes no ecological problems.

✓ LOW ODOR

✓ NON-FLAMMABLE

**READY TO USE – NO NEED TO MIX!**

✓ EASY TO USE

✓ LOW VOC

**Bone Dry Etch-A-Crete** will effectively etch troweled concrete to open the surface for the subsequent application of any of the Bone Dry Penetrating Concrete Sealers. Bone Dry Etch-A-Crete will not burn concrete.

**Bone Dry Etch-A-Crete** will remove:

- efflorescence (white mineral deposits)
- stains from rust, minerals, smoke residue
- airborne pollutants
- airborne dirt and industrial carbon
- weathering discoloration
- algae, fungus and mildew
- rust and corrosion products on metals
- cement build-up on tools and equipment

**Use full strength or dilute with water.**  
Coverage is approximately 220 square feet per gallon.
