

BONEdry

PRIMER

PRIMER

Specially formulated to fortify prior to treating with Bone Dry sealers

Allows porous concrete materials to be internally waterproofed with any of our penetrating concrete sealers.

– Available worldwide –

- ✓ COLORLESS
- ✓ NON-TOXIC
- ✓ NON-FLAMMABLE
- ✓ LOW VISCOSITY
- ✓ SPRAY APPLIED LIQUID
- ✓ COST EFFECTIVE

Bone Dry Primer penetrates deeply into porous substrates where its active ingredients fill small cracks and voids and interstitial spaces between the matrix particles. These deposits will react with Bone Dry Permanent Concrete Sealers to fill all of the small spaces within the substrate to form a permanent water barrier.

Bone Dry Primer is formulated solely for cement-based building materials and does not effectively penetrate asphalt, metal, brick or masonry, acrylic or nonporous rubber-based paints. Must be applied at full strength to attain the desired results.

Over application of the material may cause white deposits to form on the surface. These deposits should be removed by brushing and/or flushing with water prior to subsequent applications of Bone Dry sealer.
